

Attunity Oracle-CDC for SSIS

A cost-effective, rapid and complete solution that makes replication and real-time integration of Oracle data using SQL Server Integration Services (SSIS), simple, robust and easy to deploy.

Benefits

- Simplify and accelerate CDC implementation
- Deliver real-time information
- Design efficient data integration solutions
- Leverage existing SQL Server investments
- Reduce resources and costs

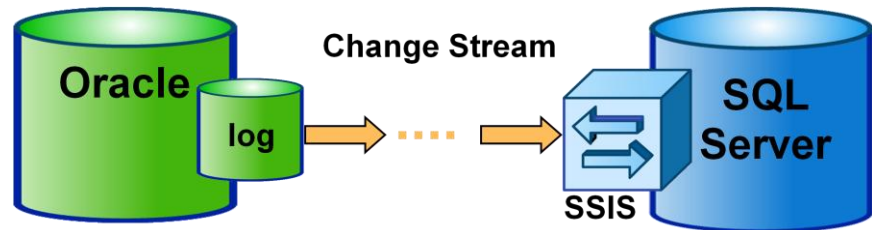

Why use Attunity CDC ?

- Minimal impact on the Oracle (source) systems
- Move data as it changes, in mini-batch, micro-batch or real-time
- Eliminate the need for data transfer batch windows
- Eliminate the risks associated with bulk/batch transfer failures
- Proven enterprise-class technology
- Easy-to-use graphical configuration

Efficient, non-intrusive, real-time integration of changing Oracle data with Microsoft's SSIS

[Attunity Oracle-CDC for SSIS](#) is the first and only tightly-integrated solution for streaming real-time changing Oracle data directly into SSIS. It dramatically simplifies the creation of real-time data integration processes, accelerates implementation and deployment times, and reduces resource requirements and costs, all with minimal impact on the Oracle source systems.

Specifically architected for the Microsoft SSIS developer community, and based on Attunity's industry-leading Attunity Stream (CDC) product that streams data based only on the changes made to the source systems, Attunity Oracle-CDC for SSIS is the industry's first and only complete solution for capturing and streaming changing Oracle data directly into SSIS, efficiently and in real-time.

Using Attunity Oracle-CDC for SSIS, users of Microsoft's SQL Server and Business Intelligence Platform can now implement enterprise-class data replication, synchronization, and real-time business intelligence (BI) and data warehousing projects, quickly and efficiently, leveraging their existing SQL Server investments and resource skills.

Key capabilities:

- Log-based, non-intrusive Oracle CDC
- Completely integrated into SSIS and the Business Intelligence Developer Studio
- Automatic generation of SSIS packages for CDC as well as full-loads of Oracle data
- Filtering of Oracle tables at the source
- Monitoring and control of CDC processing

Supported versions:

Source:

- Oracle 9iR2
- Oracle 10g
- Oracle 11g

SSIS and target SQL Server:

- SQL Server 2005
- SQL Server 2008
- 32bit and 64bit (x64)

About Attunity:

Attunity is a provider of real-time data integration and event-capture software. It has been selected by Microsoft to provide high-speed bulk connectors for Oracle and Teradata that are now available in SQL Server 2008 Integration Services, Enterprise Edition.
